

Penn Capital Floating Rate Income Fund

(formerly, Penn Capital Defensive Floating Rate Income Fund)

Investment Strategy

The Fund

A quality, high conviction, and capacity constrained approach to investing in floating rate senior secured loans and floating rate senior corporate debt.

The Approach

The Fund seeks to identify relative value opportunities with fundamental, bottom-up research while seeking to avoid common loan market pitfalls. The Fund seeks to pursue a conservative (defensive) investment strategy within the high yield debt market by generally avoiding the lowest rated (i.e., riskiest) debt instruments in the high yield market.

Our research has observed a market trend of high holdings count, high fee, capacity unconstrained loan funds with outsized exposure to CCC-rated, largest 100, second lien, and/or distressed loans which we believe detracts from an optimal risk-return profile.

The Features

By utilizing a capacity constrained approach to target quality opportunities with high conviction, the Fund has historically provided competitive returns compared to the S&P/LSTA BB Loan Index and broader market.

Performance is annualized for multi-year periods. Past performance is no guarantee of future results. Investment returns and principal values may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. All returns assume reinvestment of all dividend and capital gain distributions. To obtain performance current to the most recent month-end please call 844-302-PENN (7366) or visit www.penncapitalfunds.com. The total annual operating expenses of the Fund are 1.16% and net expenses are 0.64% for the Institutional share class. The Fund's advisor has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total annual fund operating expenses (excluding any acquired fund fees and expenses, taxes, interest, brokerage fees, certain insurance costs, and extraordinary and other non-routine expenses) do not exceed 0.64% for Institutional Class shares. This agreement is in effect until April 1, 2023. The Fund's advisor is permitted to seek reimbursement from the Fund of fees waived for a period of three years from the date of the waiver or payment to the extent it does not exceed expense limits. Performance would have been lower without fee waivers in effect.

Description of Indices and Terms: The S&P/LSTA Leveraged Loan Index is a market value-weighted index designed to measure the performance of the US leveraged loan market. The S&P/LSTA BB Loan Index is comprised of loans within the S&P/LSTA Leveraged Loan Index whose ratings are BB+, BB, BB-. Standard & Poor's Rating Services is used to determine membership within this sub-index. An investor cannot directly invest in an index.

Fund Risks: The Fund is subject to the following risks, among others: ETF risk, which is the risk that the fund is subject to the same risks as the underlying securities in which the ETF invests as well as entails higher expenses than if invested into the underlying ETF directly; foreign securities and ADRs, which involve certain risks such as currency volatility, political and social instability and reduced market liquidity. Investments in REITs may be more susceptible to adverse developments affecting a single project or market segment than more broadly diversified investments. As interest rates rise the value of bond prices will decline. Credit risk refers to the loss in the value of a security based on a default in the payment of principle and/or interest of the security. High-yield bonds have a higher risk of default or other adverse credit events. Bank loans may have similar risks to below investment grade fixed income securities. In the event of the insolvency of an agent bank, a loan could be subject to settlement risk as well as the risk of interruptions in the day to day administration of the loan. There is the possibility that the Fund may lose money or be prevented from realizing capital gains if it cannot sell a security at a particular time and price. Liquidity risk can be more pronounced in periods of market turmoil. *Or 3x the S&P/LSTA BB Loan Index, not to exceed 25%. Allocations and holdings are subject to change at any time.
